

iChemistry **SERVICE**

A photograph of three business professionals in a modern office setting. A man in a white shirt and dark trousers stands on the left, looking at a tablet held by a woman in a purple top and dark skirt. Another man in a white shirt and dark trousers stands in the middle, also looking at the tablet. The office has large glass windows and a modern ceiling with recessed lighting.

Intersolia provides chemical users with expertise and tools that assist in the process of complying with legislation and creating a safer workplace with less strain on the environment as a result. The services and solutions we deliver allow our customers to meet the requirements set by the world at large with the least possible effort. We work with all businesses that use chemical products, whether it be on a small or large scale.

iChemistry **SERVICE**

iChemistry SERVICE moves you from time-consuming administration to a profitable overview. This service allows you to reduce time-consuming work to a minimum. You can sit back and relax and enjoy an overall view of your chemical administration from all aspects. iChemistry SERVICE is our most popular service where you not only let us deliver our chemical management system iChemistry with attendant services but also allow us to take care of its administration and all other work input. Naturally you decide on the scope and the cost of the services you require.

“ *We got things organised and under control when we introduced iChemistry. Since its introduction we have more than halved the number of chemicals used in our business.* ”

Roland Liedman,
Quality and Environmental Manager
Kalmar Industries

THIS SOLUTION means we take over the lion's share of your administrative work and you delegate the majority of the responsibility to us. You only need tell us the name of the chemical products you are using, and provide us with a little basic information on your business. We will then provide you with our market leading system customised to suit your needs, and we will not stop working until everything is operating as it should.

THE UPSHOT is that you only need contribute with a minimum input as we will ensure that everything is handled in an exemplary fashion. If there is something that needs fixing, we will draw your attention to this and provide a solution by sending

a person round or by instructing one of your staff, all in line with your wishes, budget and needs. With iChemistry SERVICE Intersolia as a partner you need never be concerned about substandard procedures routines or overlooked legal requirements. If you do not hear from us, you will know everything is in order.

ICHEMISTRY SERVICE is a standard service where we take over all your administrative work involving your chemical management that can be managed remotely. All at a fixed annual cost. We let you know about all the practical input required on site, such as stocktaking and risk assessment, or alternatively you can employ our consultants who can provide these optional services.

“ *The service has given us an accessibility level that is invaluable if an accident should occur.* ”

Marie Carlsson, Inköpare
Koenigsegg

How do I get started?

1

1. AGREEMENT

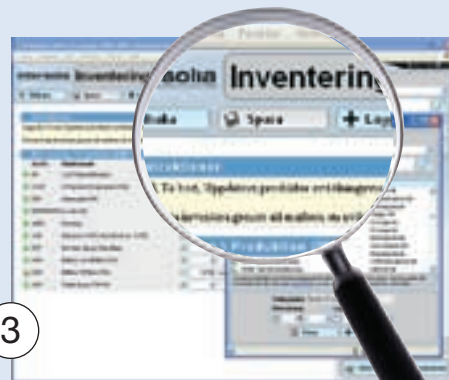

When you have decided, we normally draw up an agreement for 36 months. We will have installed and commissioned your system within a couple of days and allocated time in the future to cover all your needs. You get login details to the system along with other material.

2

2. PRODUCT CONTROL

You let us know what chemicals you have in your business, or you can hire us to do a stock take for you. We guarantee that all of your chemicals will be available in the system.

3

3. INVENTORY

You register in the system the departments and chemicals used and the quantities involved.

4

4. RISK ASSESSMENT

Follow our guide for risk assessment by using the documentation we have produced to answer a few questions about your business.

5

5. FIXED AND READY!

Now it's simply a case of sitting back and letting us take care of the rest. There will of course be regular tasks to be carried out, such as risk assessments, new stock takes etc. but you can relax, we will let you know when this needs to be done, and we can do this for you if you prefer.

6

6. AFTERWARDS

When there are things that need doing, or if something needs correcting, we will let you know and always provide you with access to an up to date summary of the status of your chemical administration.

Component functions

- Updating of material safety data sheets.
- System for information dispersion to an unlimited number of users.
- Powerful environmental report module.
- Risk assessment guide and tools for risk analysis.
- Local safety sheets.
- Handling of incidents with action list and work distribution.
- Tools for product selection/substitution.
- Summary of consumption and stock amounts.
- Individual reports and summaries.
- Fire lists.
- Status with real-time auditing and activity report.
- Manual monitoring and quality control.
- And much more...

” *After careful evaluation, we came to the conclusion that iChemistry was by far the most financially beneficial solution, no other option could compare.*”

Gunilla Pettersson, Purchaser
Luftfartsverket (The Swedish Civil Aviation Administration)

Our customers

THE GENERAL PERCEPTION among our customers is that our products and services are easy to use, good value for money and quick to get started with. Our solutions mean that the customer cuts out a lot of the time-consuming and day to day administrative work, allowing them to focus instead on more qualified health, environment and safety work and not least on their core business.

Intersolia's existing customers can be found

in most industries and fields where chemicals are handled or used. With extensive experience of both start up and day to day work on active chemical management, we serve a wide spectrum of industries on a regular basis, everything from independent engineering companies to municipalities and county councils. With our extensive experience from the majority of business lines you can rest assured that we will have the solution for your particular business.
